fólia

Obtlačky Decals

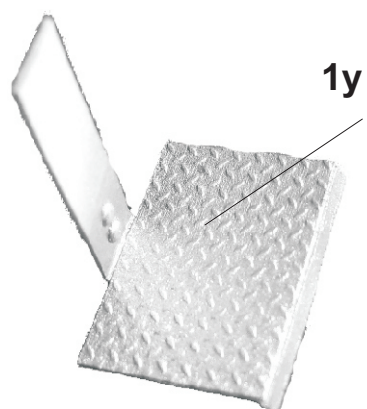

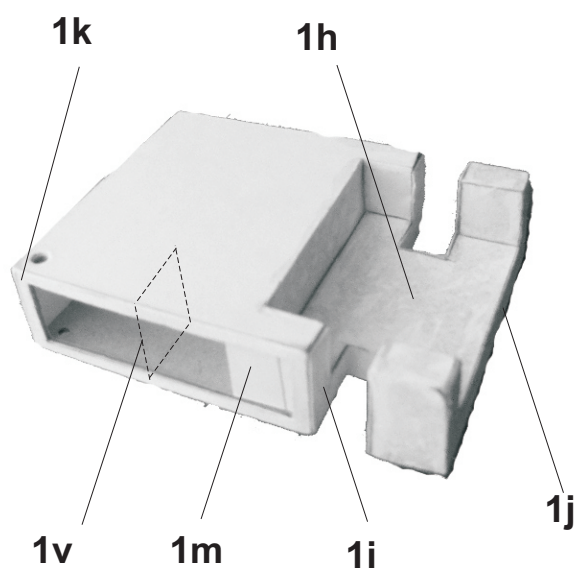

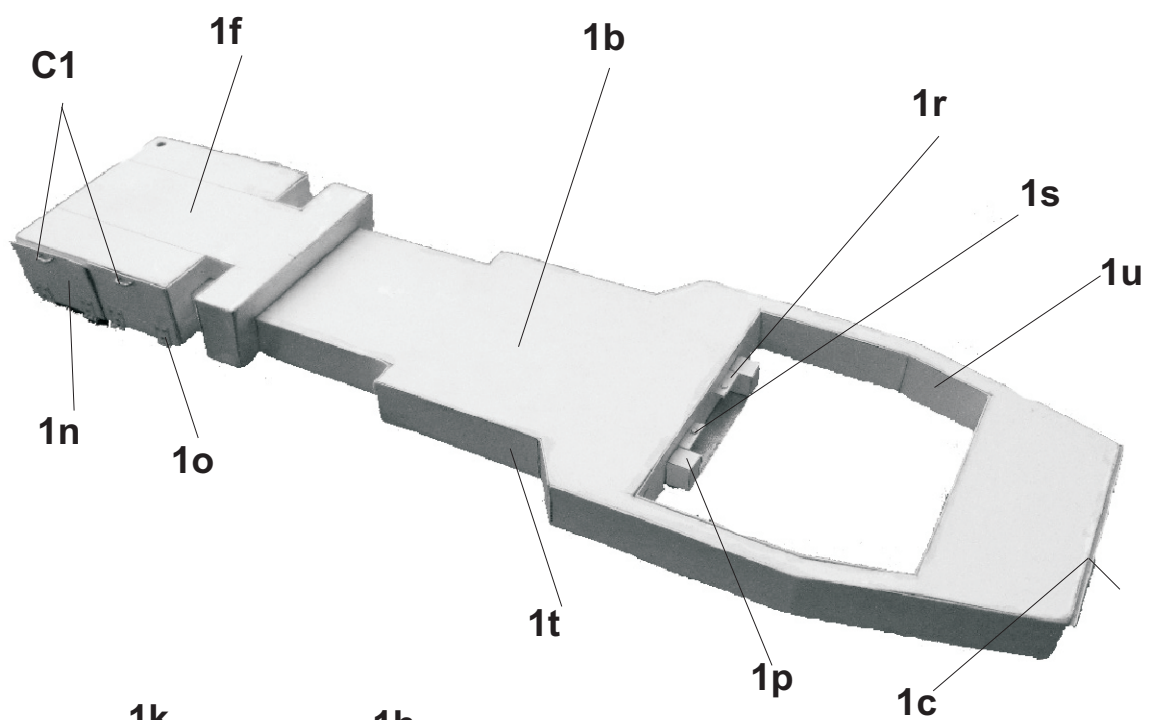

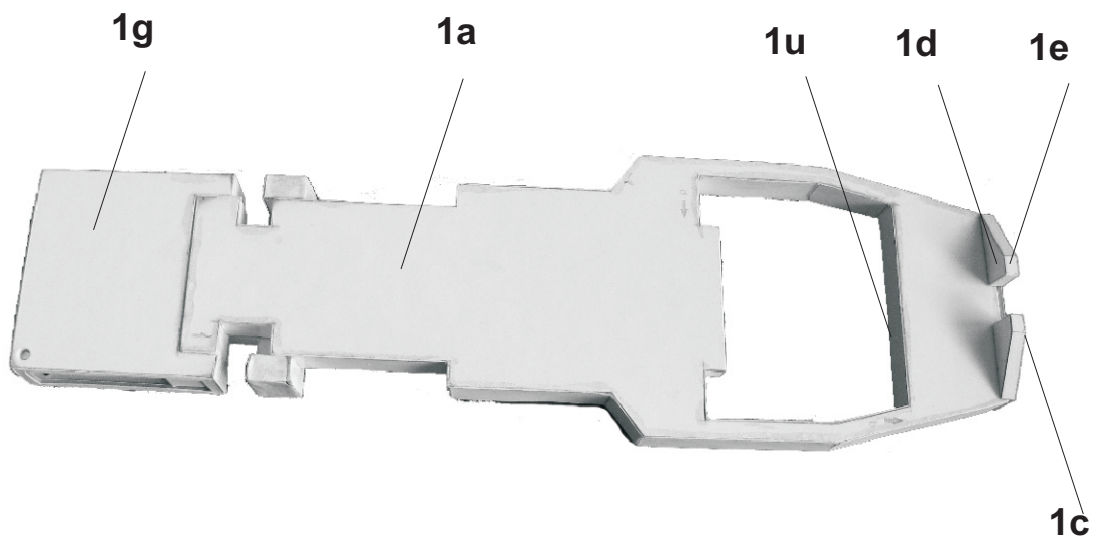

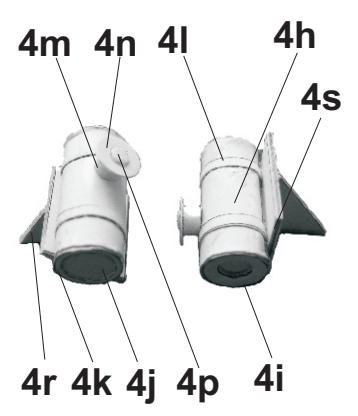

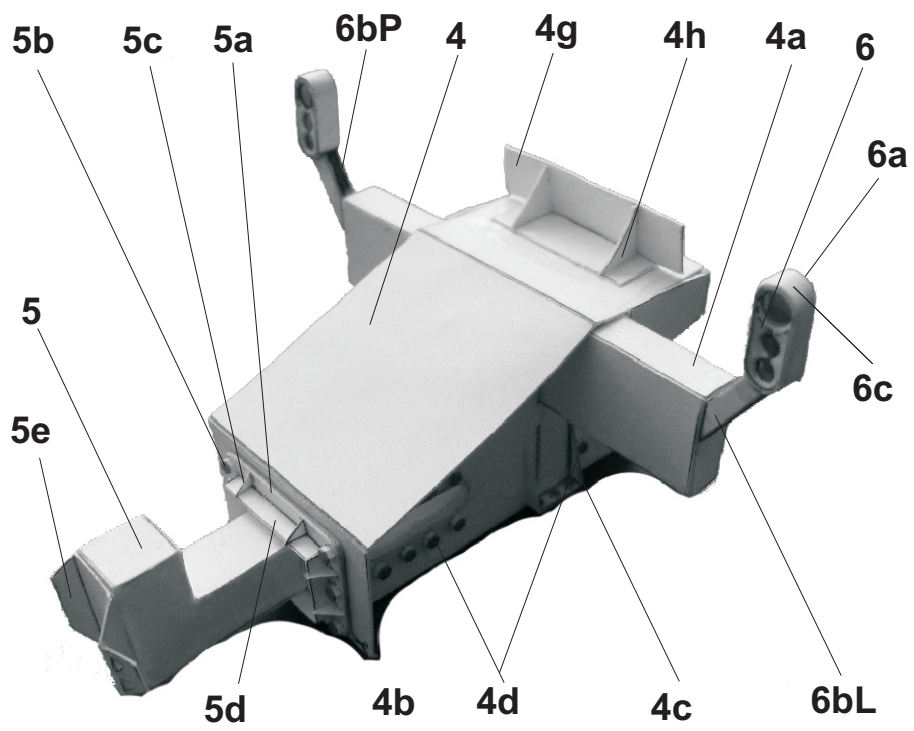

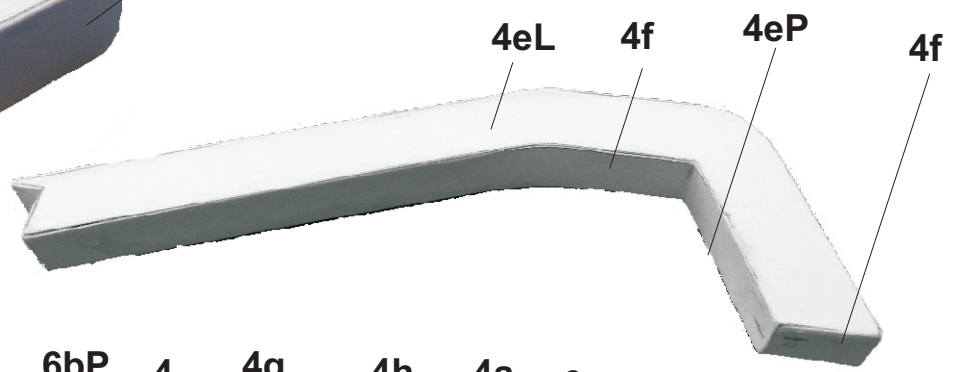

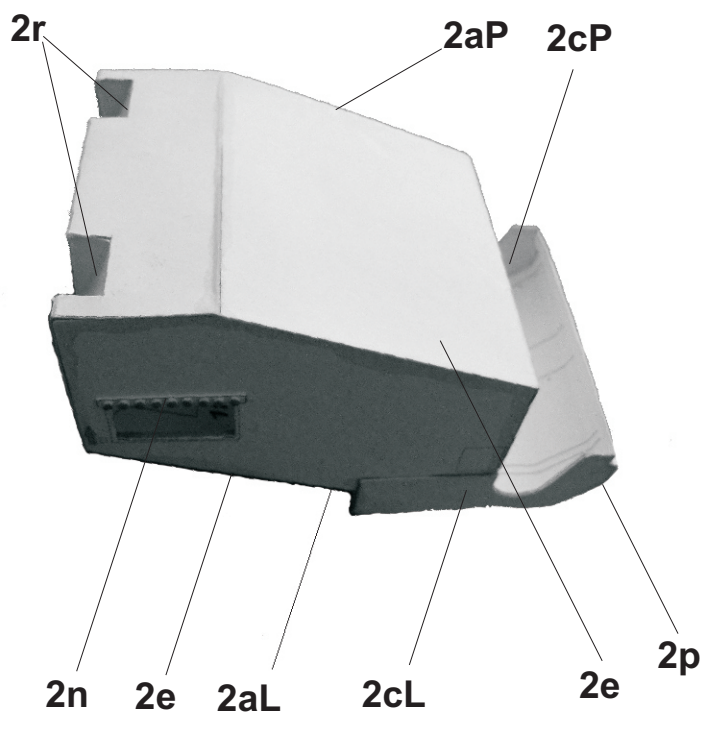

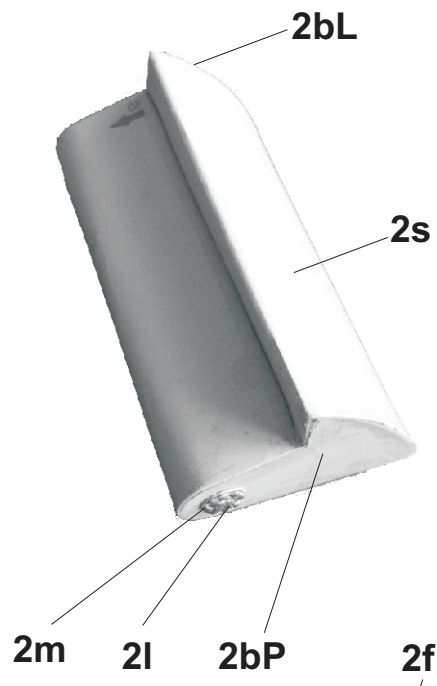

Obtlačky vyrobíme nasledným spôsobom:

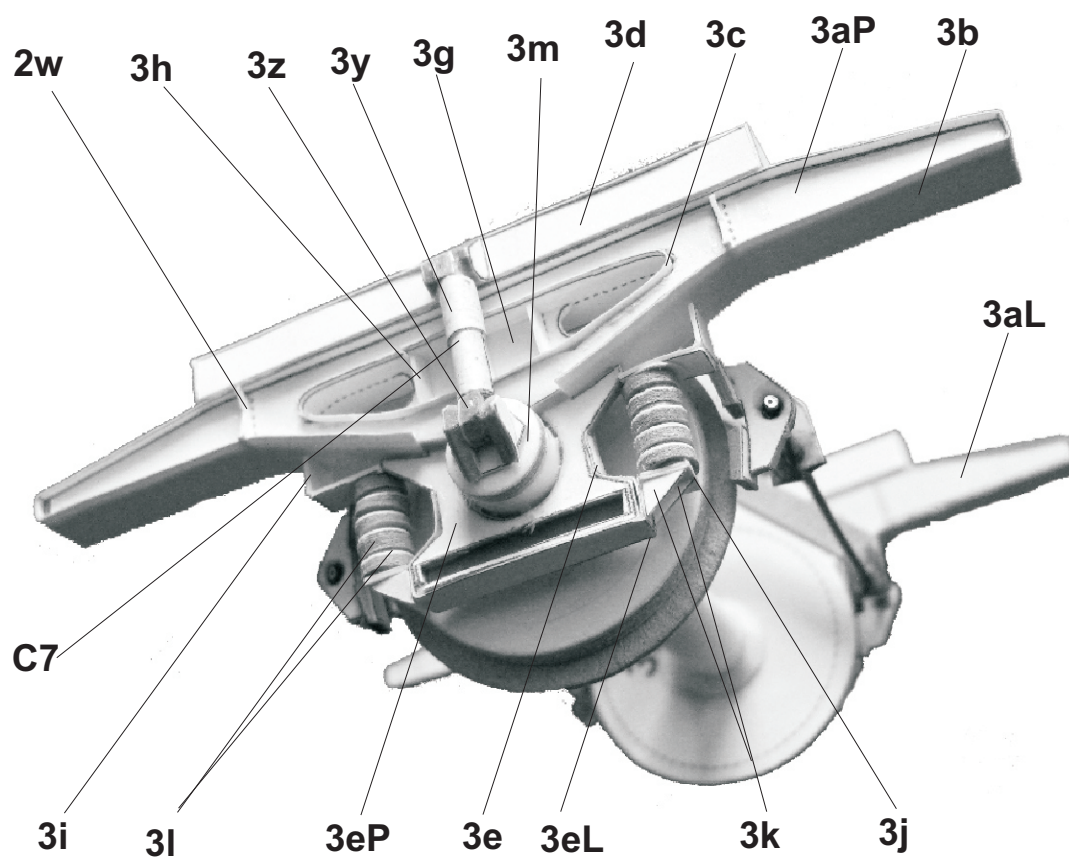

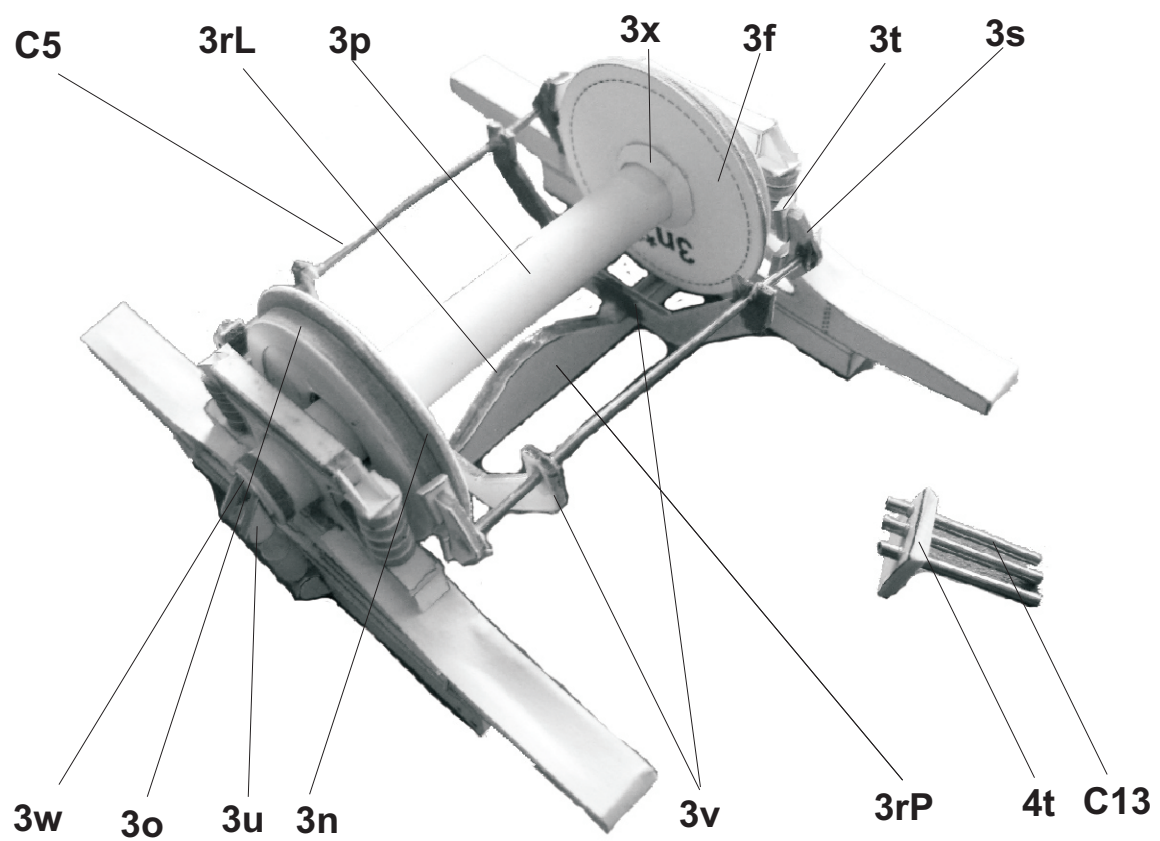

Použijeme lepiace farebné papiere (tie ktoré sa lepia po NAVLHČENÍ) a matný transparentný syntetický lak a samozrejme atramentovú tlačiareň.

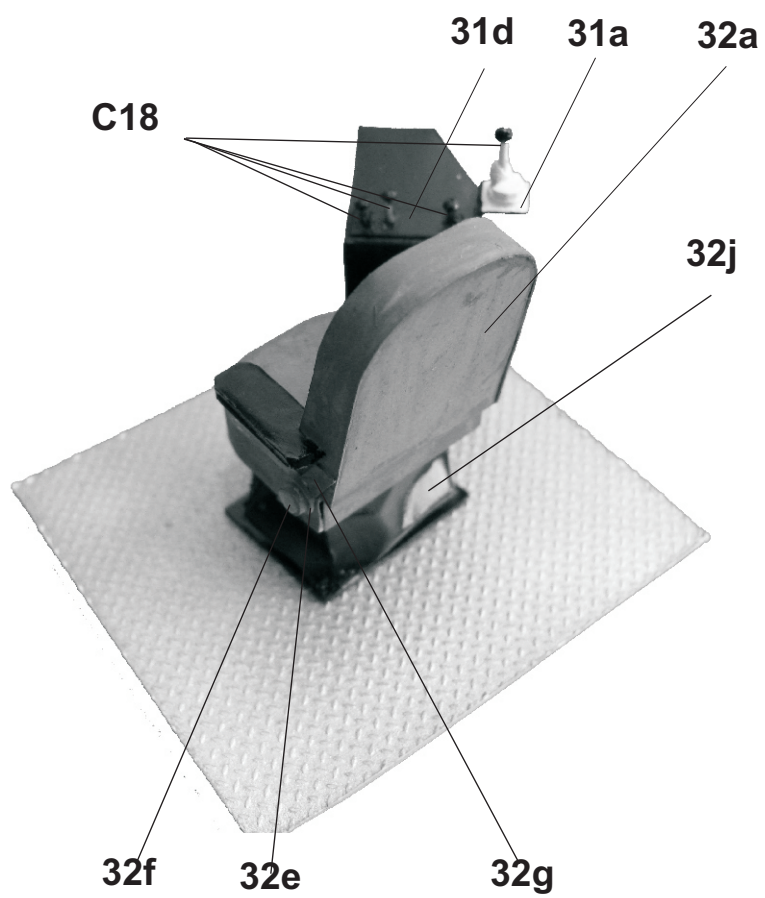

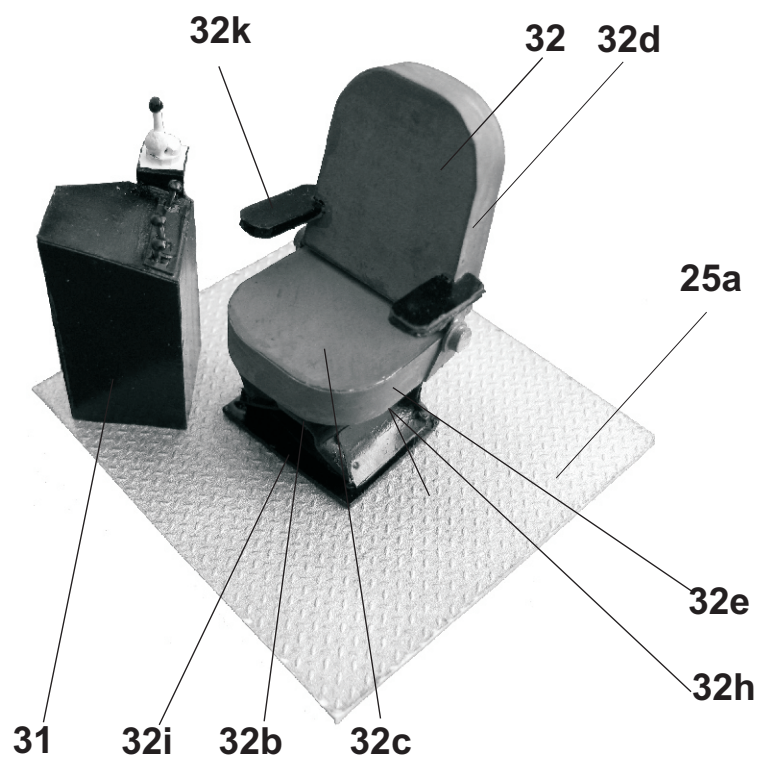

1. Zadnú stranu nastriekame lakom (nie tú farebnú)
2. Po uschnutí vytlačíme potrebný nápis.
3. Atrament trochu necháme zaschnúť a potom striekneme ďalšou vrstvou laku.

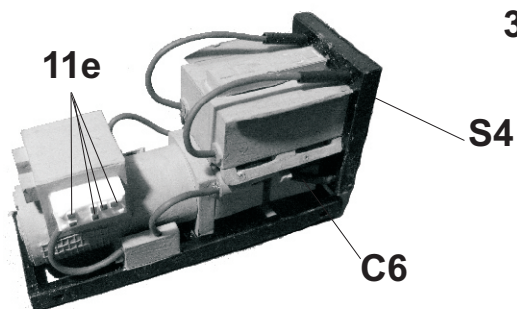

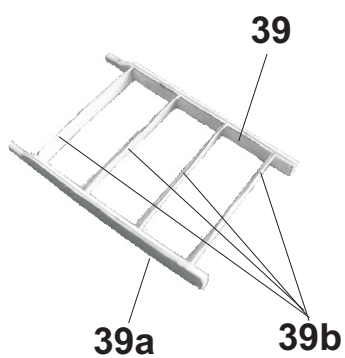

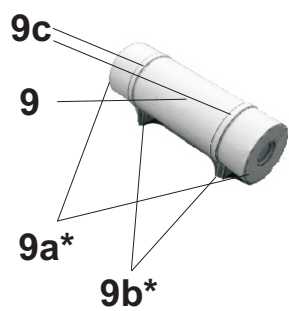

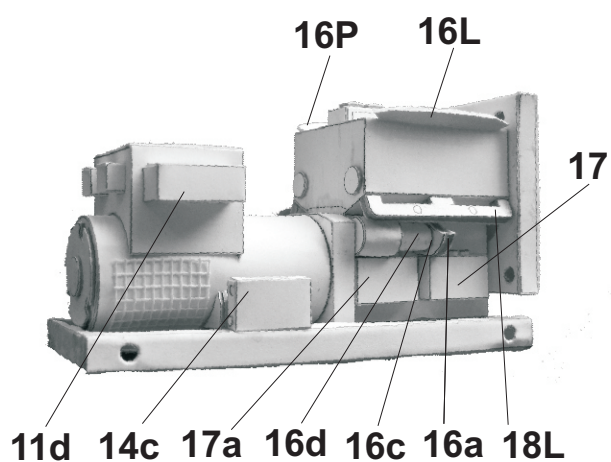

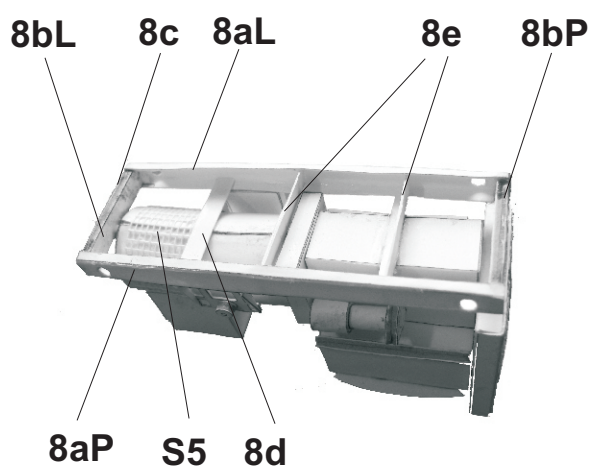

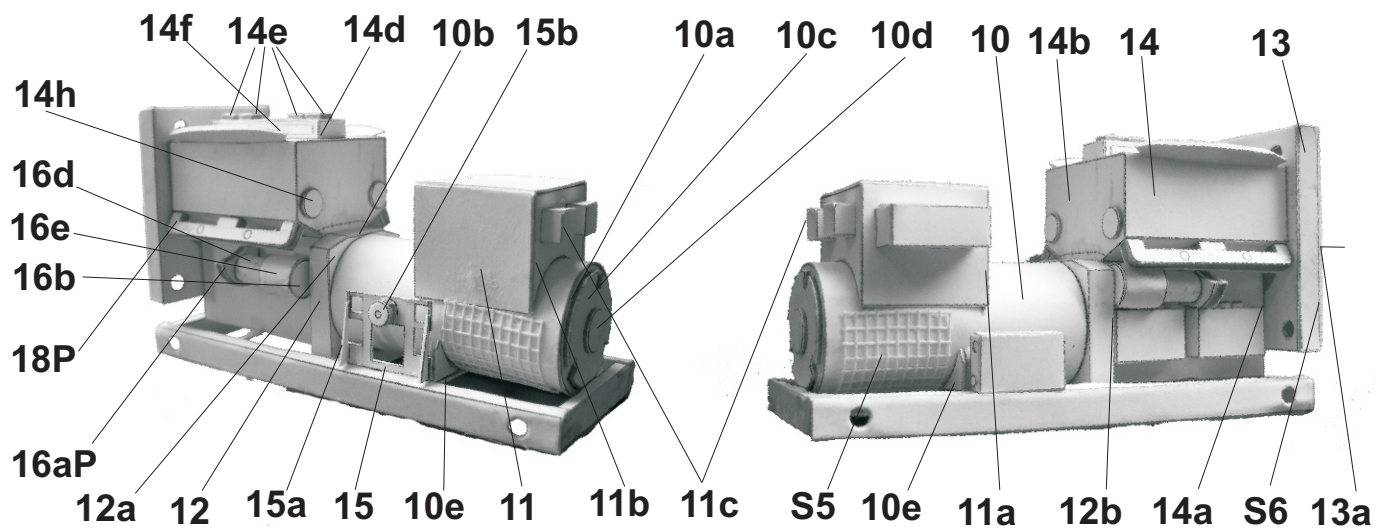

Po 3-4 hodinách ich lepíme ako klasické vodolepky (obstrihneme, namočíme do vlažnej vody na pár minút a dáme ich na model podľa predlohy str. 29)

StarGate SG 1
Oko bohov

FREE MODEL

Oko bohov je najväčšie transportné, ktoré používali Atlantida a ktoré sa našlo na Scythiankej domovskej planete P90-001. Je to planéta v Mládnej omle, ktorá obklopuje skupinu Sotorno pred 5000 rokmi, keď sa pokúsili kolonizovať Krieh. Planéta zdieľa Androm, zvanú aj Andromeda, pred tým, než sa stala aj domovskou planetou transportného. Aktivácia spracovaných symbolov na oboch stranách, zaradenie vnútornej energie, ktorá otvára otvory v oboch stranách. Zariadenie slúži na prenos (prekročenie) kľúčových prvkov k najväčšiemu objektu. To umožňuje vytvoriť a efektívne odovzdať pri papieri. Princíp fungovania je odlišný od transportných kľúčov. Podrobné ako nie priky artické technológie, ktoré je základom na ovládanie kľúčov.

Tomb Raider
Triangel svetla

FREE MODEL

Kedyś dávno dopadli na Zem obrovský meteorit. Priamo v jeho kráľovstve vzniklo následne ľudské mesto, najvyššie mesto (vlastne jediné) v tej dobe a jeho obyvatelia uchovávali túto meteoritu, ktorú prišli na sile im umožnila tak rýchlo napodobovať vo vývoj. Z významného tela vynikli trojuholníkové znaky ako Trojuholník svetla (The Triangle of Light) - artefakt umožňujúci cestovať a manipulovať s časom. Čoskoro však došlo k zmiznutiu trojuholníka, a tak bolo celé mesto za hrad zrušené, artefakt rozštiepaný na dve časti a obojstranné následne odovzdané na opačné konce sveta, aby sa zabránilo v zrozu ukončení ľahko nebezpečnej relikvie.

Stroj času

FREE MODEL

Stroj funguje na princípe vzájomných energií. Kľúčové časti diera brány smetákov magnetickým poľom smerujú energie tak na definované miesto v priestore, ako aj v čase. Môže v tomto okamihu ako jedinou vlnu prejsť do budúcnosti, ktorých odpadá druhú a termodynamiku prostredníctvom informácie naprieč v reálnom čase do minulosti podľa potreby času. Vďaka špeciálnemu systému. Každá energia má svoj signál a časová os funguje ako celok pre vzájomnosť v čase, je vždy určená na, podľa toho ako dĺžka termodynamiky účinku zostane.
