

Williams™

by BACHMANN®

2 0 0 9

Hello and Welcome!

The coming year promises to be very exciting for Williams by Bachmann™. We have been busy adding many improvements to our existing product line as well as designing new items and researching new paint schemes for your all time favorites.

We are proud to introduce our first new Williams by Bachmann™ model, the *Peter Witt Streetcar*. Based on original prototype drawings the model features a detailed interior, all-wheel drive, a reverse board, digital streetcar bell and more! The *Peter Witt* is offered in seven city transit company paint schemes.

New to our *E-7 locomotive* selection are two striking paint schemes: Milwaukee Road, (shown on the front cover) and the Texas Special. These are some of the most intricately decorated items that we have ever produced and feature new details such as add-on grab irons, finely executed see through screening and body fluting.

Our passenger roster includes several new items. First in our 72' *Streamliner* category are matching and very colorful Milwaukee Road and Texas Special cars for the *E-7s* mentioned above. Also for our friends to the North, we have added a Canadian Pacific consist. The 72' *Streamliner* cars are available in four car sets and two car add-on sets. For those of you with semi-scale railroads, we have added New Haven in 60' *Madison* four-car sets, and Santa Fe four-car sets in our *O-27 Streamliner* series.

Don't forget to check out our O gauge scenery selection. New to our *SceneScapes*™ product line this year are eight new O Scale figure assortments. These along with our familiar line of Bachmann *Plasticville*® U.S.A. and other *SceneScapes*™ landscaping products, provide you with everything you need to create a great layout.

Contact your favorite hobby retailer to order Williams by Bachmann™ today, and thank you for your continued support!

PETER WITT STREET CAR

NAVIGATES 0-27 CURVES • STANDARD PACK: 2

- all-wheel drive
- precision can motor with two flywheels
- hidden drive train and electronics
- detailed interior
- painted interior with seats
- photo-etched brass safety screen
- digital trolley bell
- electronic reversing unit

While serving as Cleveland's Street Railway Commissioner, Peter Witt designed an all-steel, single-operator streetcar that distinguished itself from others of the era by its use of the center door as an exit only. Passengers could pay the waiting conductor as they boarded at the front and exited at the center of the car, an arrangement which reduced stop times, improved schedules, and increased efficiency. Though designed originally for Cleveland, the Peter Witt Street Car went on to service in cities throughout the world from the 1930s until the early 1960s.

- front headlights
- etched metal grills covering side vents and roof fan
- die-cast operating front couplers

Struggling to compete with GM's dominance, ALCO introduced its first diesel locomotive, the FA-1 in 1945. ALCO realized that there was a tremendous demand to satisfy from the railroads phasing out steam power. The unit was designed as a dual purpose locomotive suitable for freight & passenger service. ALCO produced almost 700 units between 1945 - 1950 for railroads all over the country.

- die-cast trucks, truck sides, and pilot
- Mars light headlights
- add-on detail
- operating front couplers

In 1937 General Motors introduced the first "E" series diesel locomotive. The 2000 H.P. units were designed for high speed passenger service. E-7 production began at the end of World War II, with more than 400 units built from 1945 until 1949. The E-7 was purchased by almost every major railroad and quickly became the most popular passenger loco ever built.

- True Blast II™ digital horn and bell
- durable ABS plastic shell
- die-cast trucks, truck sides, and pilots
- die-cast operating couplers
- dual headlights
- sturdy stamped metal handrails

The GP, or General Purpose, class was introduced in 1949. General Motors built more than 4,000 GP models for more than 45 railroads over the next twelve years. This locomotive is so versatile that many railroads rebuilt them and continue to use them today, over 40 years later. Ours is true to scale size, and will operate on curves as tight as 0-27.

GENERAL ELECTRIC DASH 9 SCALE DIESELS

NAVIGATES 0-31 CURVES • LENGTH 17.75" • HEIGHT 3.875"

- 6 wheel power trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell

- durable ABS plastic shell
- die cast trucks, truck sides, and pilots
- dual headlights
- sturdy stamped metal handrails

GE's C44-9W is the locomotive's official designation but it is commonly referred to as the Dash-9. You'll likely see one of these modern giants on the rails today. Put one to work on your railroad and see how easily it pulls even the heaviest of loads!

GENERAL MOTORS BL-2 SCALE DIESELS

NAVIGATES 0-27 CURVES • LENGTH 15" • HEIGHT 4"

- 4 wheel trucks with traction tires
- powered by dual motors, flywheel coasting action
- all metal gears and wheels
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell
- durable ABS plastic shell
- die cast trucks, truck sides, pilots, and fuel tank
- dual headlights
- die cast operating couplers,
- 19 individually installed grab irons and handrails.

In 1948, EMD's Division of GM debuted a new concept to American railroads; the BL-2 locomotive. Offered as an all-purpose solution for "Branch Line" service, it was a redesigned car body on a modified F-3 chassis. It offered the engineer greater visibility to the rear of the locomotive. They were costly to build and maintain, but the idea was revolutionary, making this locomotive a historical milestone towards the development of the prolific GP series introduced the following year. Only 59 units in total were built. Several are preserved in museums and a few are still used to pull scenic railroads.

DID YOU KNOW?

When locomotive manufacturers introduce a new model they make a demonstrator model available to interested railroads so they can try it out. Only one BL-2 Demonstrator was built and it was later sold to Chicago & Eastern Illinois. You can use our BL-2 demonstrator with any railroad on your layout and still be prototypical!

FAIRBANKS-MORSE TRAINMASTER SCALE DIESELS

NAVIGATES 0-31 CURVES • LENGTH 17" • HEIGHT 4"

- 6 wheel trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears and wheels
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell
- durable ABS plastic shell
- die cast trucks, truck sides, and fuel tank
- dual headlights
- die cast operating couplers
- wire handrails

Fairbanks-Morse introduced the TrainMaster in 1953. These 2400 H.P. locomotives were another horsepower milestone for FM, towering over other locomotives of the time in both size and power. Our models' good looks and powerful drive-train live up to the legendary TrainMaster name.

- dual headlights
- die cast operating couplers
- wire handrails

In 1939, GM's EMD division introduced two switcher locomotives, the NW-2 and its smaller sibling the SW-1. The NW-2 was equipped with a 1000 H.P. twelve cylinder engine. It was GM's most popular switcher of all time, with over 1100 units sold. The last unit was manufactured in December of 1949. Many railroads and shortlines have rebuilt these units due to their flexibility and reliability.

GENERAL ELECTRIC U33C SCALE DIESELS

NAVIGATES 0-31 CURVES • LENGTH 17" • HEIGHT 4"

- 6 wheel trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell
- die cast trucks, truck sides, pilots, and fuel tank
- dual headlights
- sturdy stamped metal handrails.
- die-cast operating couplers

GE entered the road switcher market in 1960 with the introduction of their 'U' (Universal) line of diesels. Their goal was to offer replacement diesels for the aging fleet of first generation diesels. This model group was quickly nicknamed 'U-Boats'. The U-33c Diesel was first produced in 1968 with 3300 H.P. and sporting large radiator wings to make it easily distinguishable from earlier model U-Boats.

- durable ABS plastic shell
- die-cast trucks, truck sides, and pilots
- die-cast operating couplers
- dual headlights

In 1937, new railroad regulations required two men to operate any locomotive weighing more than 90,000 pounds. Starting in 1940, GE built this miniature switcher to supply the railroads with the largest diesel that one man could operate. Over the years, 44 ton locomotives were built by many manufacturers, but GE sold the vast majority. Ours is a great entry-level item for you, your children, or grandchildren.

GENERAL MOTORS FP-45 SCALE DIESELS

NAVIGATES O-31 CURVES • LENGTH 17" • HEIGHT 4"

- 6 wheel power trucks with traction tires
- powered by dual motors
- flywheel coasting action
- all metal gears
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell
- die-cast trucks, truck sides, pilot, and fuel tank
- dual headlights
- prototypical wire form handrails
- die-cast operating couplers

Originally built for passenger service at the request of the Santa Fe, this 3600 H.P. unit was later used for freight service as well. The locomotive was basically a SD-45 with a different body. The original purchasers of these locomotives were Santa Fe and Milwaukee Road, but they later wore different paint schemes as railroads merged and locomotives were sold or traded-in for newer units.

- dual headlights
- prototypical wire form handrails
- die-cast operating couplers

GM retook the horsepower lead in 1965 with the introduction of the SD45 locomotive. They equipped it with a new 20 cylinder engine designed after a Japanese marine engine, the largest power plant ever used in a locomotive. The SD45 was able to generate 3600 H.P., a 20% improvement over the SD40 model.

In July 2005, Union Pacific Railroad announced that they would be decorating six special locomotives to honor the people and the companies of the major railroads that had merged with UP. Each locomotive number signifies the year that the railroad became a part of the Union Pacific system. All new for 2008. See your Williams dealer to purchase one today!

NAVIGATES 0-31 CURVES • LENGTH 22" • HEIGHT 4"

SOUTHERN PACIFIC DAYLIGHT
Item No. 40001 • Standard Pack: 2 • \$399.95

The Southern Pacific 4-8-4 GS-4 locomotive is probably the most recognized Streamlined Steam locomotive ever built. This large Northern Class locomotive allowed Southern Pacific to reduce the travel time more than 25% from 14 hours down to 10 hours.

- 8 drive wheels with 2 traction tires
- powered by powerful single motor
- flywheel coasting action
- all metal wheels and trucks
- electronic 6-amp reverse board

- True Blast II™ digital whistle and bell
- smoke unit
- constant voltage headlight
- die-cast engine
- 12 wheel tender with water scoop

S-2 TURBINE SEMI SCALE STEAMER

NAVIGATES 0-27 CURVES • LENGTH 20" • HEIGHT 3.5"

PENNSYLVANIA RR - GREEN #6200
Item No. 40401 • Standard Pack: 2 • \$319.95

- 8 drive wheels with 2 traction tires
- powered by single powerful motor
- flywheel coasting action
- electronic 6-amp reverse board
- True Blast II™ digital whistle and bell
- nickel plate detail parts
- smoke unit
- constant voltage headlight
- die-cast engine
- 12 wheel tender with water scoop

Turn up your transformer and let this steam heavyweight storm around your layout. The classic design of the engine and tender will please any model train enthusiast. This locomotive is not made to sit on the shelf, it is made to run and it will run for a very long time.

4-6-4 HUDSON SCALE STEAMERS

NAVIGATES 0-42 CURVES • LENGTH 24" • HEIGHT 4"

- 6 drive wheels with 2 traction tires
- powered by single powerful motor
- flywheel coasting action

BERKSHIRE SEMI SCALE STEAMERS

NAVIGATES 0-31 CURVES • LENGTH 19.5" • HEIGHT 3.75"

- 8 drive wheels with 2 traction tires
- powered by a powerful single motor
- steel rimmed wheels
- electronic 6-amp reverse board
- True Blast II™ digital whistle and bell
- die-cast operating coupler
- smoke generator
- Baldwin disc drive wheels
- die-cast trucks
- wire form handrails and grabrails
- smoke fluid included
- die-cast loco and tender

First introduced in 1927, the 2-8-4 Berkshire was designed and built by both Alco and Lima. The newly designed 4-wheel trailing truck allowed for a larger boiler that developed much more steam. Even though only 750 Berks were made, they were popular for longer than most other steamers built in the same era. The last Berkshire was built in 1949 by Lima.

WilliamsTM

by BACHMANN[®]

Golden Memories Series

Dear Model Train Enthusiast,

It is with great pride that we present to you these replicas of the most popular Lionel® Post-war train sets available over the last fifty years. By choosing Williams by Bachmann, you can own the trains that you dreamed about in your childhood and still desire as an adult. Though the original models of most of the sets in this catalog are valued at more than \$2000 in “like-new” condition*, some are so rare that they are almost impossible to find at all! Williams by Bachmann offers perfect reproductions at a fraction of the price.

On the outside, our models are the spitting image of the trains you remember, all dressed up in their perfectly applied paint and decorations. The Santa Fe *Super Chief* gleams in silver and red, the S-2 Turbine is poised and ready to run full steam ahead, and the pride of the Pennsy fleet, “*The Congressional*,” prepares to pamper its passengers on another trip from New York to Washington, D.C.

We spare no expense to insure that these models have all the premium features that you remember, including die-cast frames, wire mesh vents, and steel rimmed drivers on the steam locomotives. Inside, the mechanisms and electronics are time-tested designs using modern maintenance-free can motors, metal gears, and trouble-free electronics. The sound system offers an easy to operate horn or whistle and bell, allowing you to enjoy the clickety-clack of the trains. Williams by Bachmann products are the preferred choice of many museums that operate train displays. Their rugged design meets the demands of a continuously running daily display.

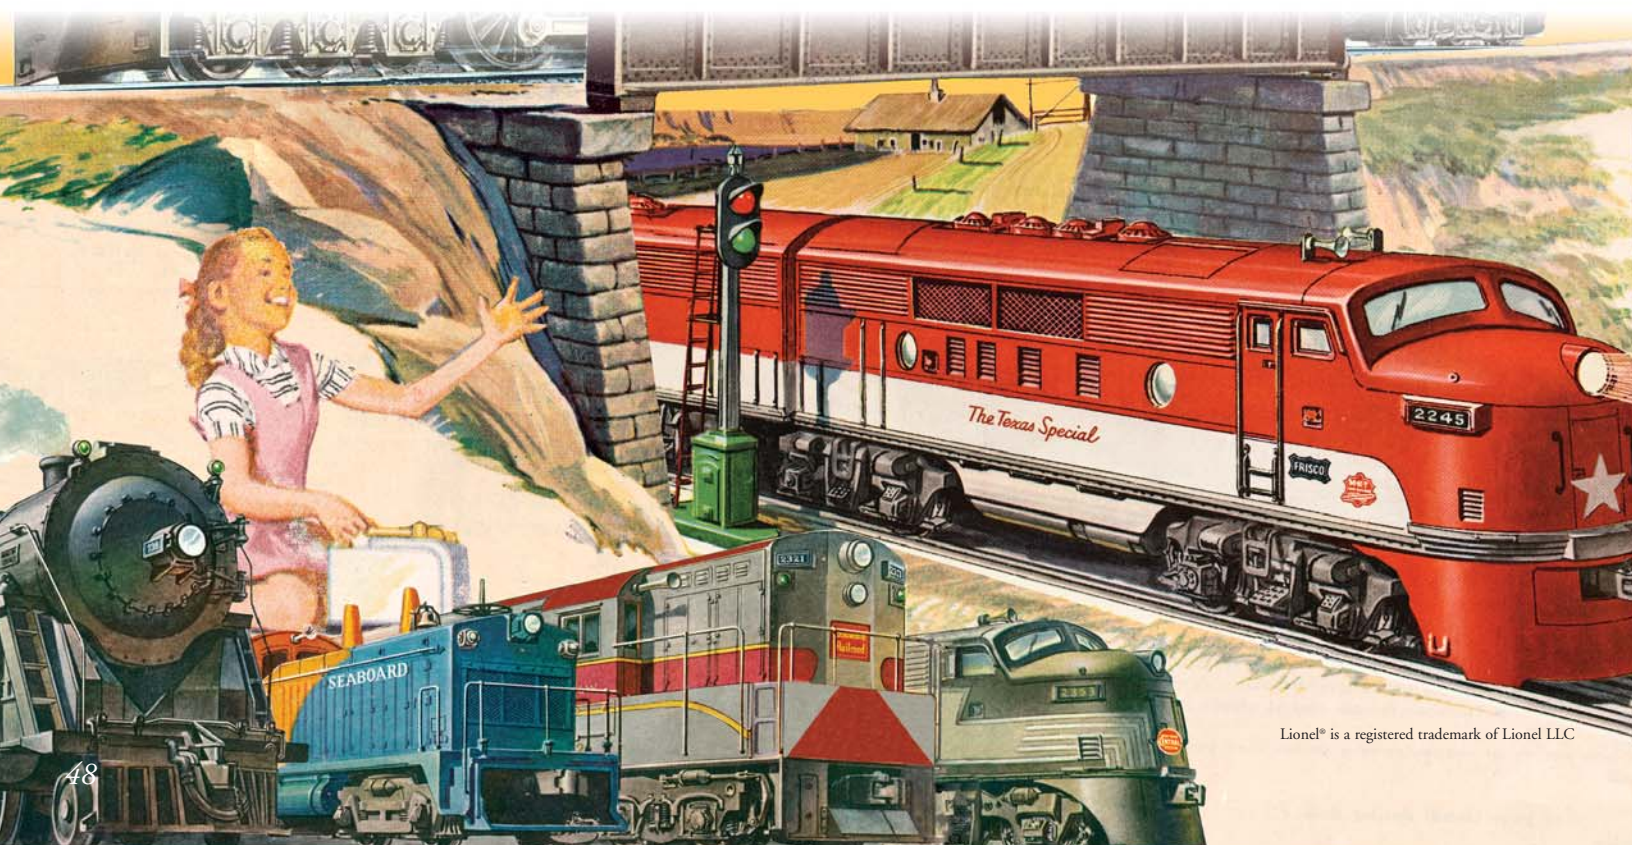

In addition, we are the only O-Gauge model train company to offer a limited lifetime warranty, providing added assurance that you will enjoy your trains for many years. After all, we remember what it was like to open that box on Christmas morning. Brimming with anticipation, you just couldn't wait to get that train on the track. With Williams by Bachmann, you'll be off in no time! Just take your locomotive or set out of the box, put it on the track, and turn the transformer handle. All of our items have a one page instruction sheet outlining the basic operation and care of you unit, with no programming steps or thick manuals to read, so you can just enjoy your trains! We thank you for taking the time to review our products and we are confident that you will be pleased with all of the choices you make.

Sincerely,
Williams by Bachmann

***The Collector's Value** is the price you would pay for the original product if you were to buy it today in “like-new” condition.

Couple a scale-detailed "B" Unit between the "A" units of your big Diesel to get a really long power plant. Couplers are not remote control. Length 13.25".

ALL ABOARD! THE "ILLINOIS CENTRAL"

The brown, orange, and gold colors, long a familiar site along "Ol' Man River," are a big part of Williams Golden Memory Series line-up. The big lines of the Mid-West prefer diesels because they give rocket-action power for high speeds over long, flat distances. And this Williams "2363" Illinois Central model gives you that same rocket-action power.

Locomotive Features:

- A-A length 27" height $3\frac{7}{8}"$
- 4 wheel trucks with traction tires
- dual can motors on powered unit
- flywheel coasting action
- electronic 6-amp reverse board
- True Blast II™ digital horn and bell

- 1 No. 2623 Railway Express Agency Baggage

STEAM POWER 6-8-6 PRR S-2 TURBINE

Item No. 40499 • Standard Pack 2 • \$319.95

Four of the finest cars in the entire array of Williams rolling stock are featured in this magnificent passenger train. Richly-enamelled Pullmans have twin bulb interior lighting and are patterned after newest type cars. The "Boat-tail" Observation has a roof antenna and a solarium just like streamliners on the crack transcontinental trains. The locomotive is a 20-wheel Pennsylvania steam turbine type, built especially for fast runs. Realistic water scoop is built into the underside of the tender. Train length is 5' 7".

Classic Reproduction Series

LUXURY LINES GREEN O-27 STREAMLINER 4-CAR SET

Item No. 43252 • Standard Pack 2 • \$239.95

Includes:

- 1- No. 2400 "Maplewood" Pullman

Item No. 00244

Compatible with:

- F3 locomotives only

PLASTICVILLE® U.S.A. BUILT-UPS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. Now, in addition to our traditional, easy-to-assemble kits, Bachmann is pleased to offer these pre-assembled *Plasticville® U.S.A.* buildings.

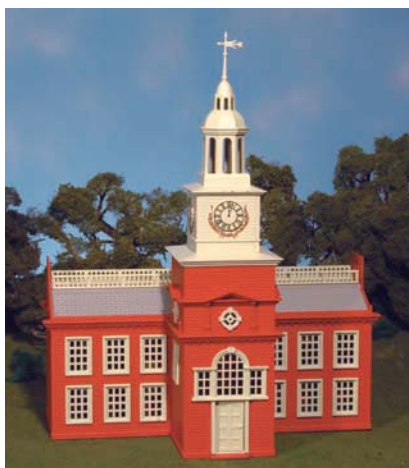

Plasticville® pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

(covers 4' x 8' sheet of plywood)
Item No. 32901 • \$19.95

GRASS MAT - 50" x 34"
(covers 4' x 2.5' sheet of plywood)
Item No. 32902 • \$8.95

SCENESCAPES™ TREES

HO and N Scale Standard Pack: 12; O Scale Standard Pack: 6

Bring your urban or countryside railroad to life with realistic SceneScapes™ trees by Bachmann. Create your own grove or blanket a hillside in dense forest with deciduous and coniferous trees offered in a variety of sizes. Though suitable for all scales, the most common size/scale association is denoted in parentheses after each description (N, HO, or O). Please note the number of trees per box may vary from the photos as shown. The number of trees contained in each box is also indicated in parentheses.

- for use with all train layouts
- realistic colors
- removable bases for more placement options
- size assortment for added realism

CONTACT LUBE**
Item No. 99981

GREASE
Item No. 99982

HEAVY GEAR OIL
Item No. 99983

LIGHT GEAR OIL
Item No. 99984

Lubricants for Model Railroad Professionals

For the best care and maintenance of motive power, rolling stock, and track, Bachmann has a full line of premium-grade lubricants. Four *E-Z Lube*® products are offered:

- light gear oil
- heavy gear oil
- heavy duty grease
- conductive contact lubricant

Each of the lubricants has a specific purpose. The light gear oil is for use on all gears, bushings, shafts, and bolsters. It is non-shedding and will not “sling off.” The heavy gear oil lubricates for extended periods of time and is formulated for use on motor bushings, bearings, valve gear, side rods, and draft gear boxes. For applications requiring heavier viscosity material, such as Large Scale trains, it’s best to use the heavy duty grease. And for superior electric motor maintenance and track cleaning, your choice is the conductive contact lubricant.

With proper maintenance, you can extend the life and enjoyment of your railroad equipment for many, many years. We urge you to establish a sensible maintenance schedule and to use our *E-Z Lube*® products for professional care.

SMOKE FLUID

Standard Pack: 24 • \$7.50

SMOKE FLUID (2.25 oz.)
Item No. 99993
